

Winter Care Kit

with a personal mini first aid kit,
keeping you and your car
on the move

Why buy multiple items which are not always available in one shop, when this kit provides the complete solution in one pack.

Packed into a translucent polypropylene carry case, at a stroke you will have the tools to de-ice, de-mist and remove snow from your car, making your journey safer. Plus, in the event of breakdown, a mechanical torch, foil blanket for warmth and a complete first aid kit separately packed for minor incidents, could prove invaluable. Thousands of motorists were stranded on stretches of the motorway network overnight when a foot of snow fell suddenly in January. The main concerns were warmth and light. This kit takes care of both and much more besides.

First Aid for you, and First Aid for your car!
